EDUCATION

Master of Computer Science | 2022-2024

Sahodaran Ayyappan Smaraka SNDP Yogam College, Konni, Pathanamthitta

Bachelor of Computer Applications | 2019-2022

Sahodaran Ayyappan Smaraka SNDP Yogam College, Konni, Pathanamthitta

PROJECTS

RFID Based Attendance System

The RFID-based Attendance System automates attendance tracking for educational institutions by leveraging RFID technology. Each student is provided with an RFID tag, which is registered in the system and used to record attendance by placing the card near an RFID reader. The system is integrated with Arduino boards for data processing, transferring information to a host computer system for storage and analysis. This project enhances the accuracy, security, and efficiency of attendance management, eliminating manual methods and human errors.

Digital Dictionary App

The Digital Dictionary application is an interactive web-based tool designed to provide quick access to word definitions, pronunciations, examples, and other linguistic information. Utilizing a clean and user-friendly interface, it integrates seamlessly with the Free Dictionary API, making real-time lookups efficient and straightforward.

The Green Thumb Chemist

The Note App is a simple and intuitive web application built with vanilla JS designed for creating, storing, and managing notes.

SKILLS

- JavaScript, Java, HTML5, CSS, Python, C

LIBRARIES AND FRAMEWORK

- Bootstrap

TOOLS AND PLATFORMS

- Git
